DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-5, drawn to a tire, classified in class 152, subclass 539.
 - II. Claims 6-8, drawn to a rim, classified in class 301, subclass 95.101.
2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as with a rim in which the included angle (of the bead seat support surfaces) is less than 20 degrees or greater than 24 degrees. Furthermore, invention II has separate utility such as with a tire in which the bead seats form an angle less than 10 degrees or greater than 12 degrees with respect to the tire axis of rotation. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Richard Streit on February 25, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
